

## Operational Security Services Analyst

This is an exciting opportunity to join our vibrant, rapidly evolving business as Operational Security Services Analyst, supporting our operating businesses by delivering a secure IT Operations environment that is appropriately managed, expertly maintained and readily available.

Redde Northgate was formed in early 2020 following a successful merger, bringing together a broad mix of market-leading operating companies to become the UK's foremost integrated mobility solutions provider. IT is at the heart of our business and we continuously review how we deliver our services, the innovation opportunity we provide and our overall approach to the demands of our growing, corporate business.

Joining our IT Operations and Service Delivery team in the early stages of our exciting journey, you are an in-house security services subject matter expert. You hold a vital role in our team – ensuring that all day-to-day activities including data backups, server and device patching, antivirus deployment, monitoring & alerting, incident response, vulnerability management, change control, availability & performance management of the security management platforms are carried out within a controlled and compliant framework.

In short, it is a great time to work here and, as Operational Security Services Analyst, you can have a significant impact on how we work, how the business develops and how successful we can be.

### About you

- You can demonstrate success in a similar IT operational security services role for a large and complex business group;
- You have a proven background in a security services environment with extensive Windows Service & MS Exchange experience and a working knowledge of:
  - Virtualisation technologies & SAN/NAS technologies
  - Cloud technologies e.g. Azure/M365 and Backup technologies including Veeam, SRM, Commvault
  - DR, failover and BCP technologies and processes
  - ADFS and PKI process for internal and external security
  - Anti-virus deployment across multiple devices including Webroot, Defender, Sophos
  - Server, Device and Application patch management processes and software e.g. WSUS, WPP, Barramundi
  - SIEM and iOS switch management.
  - Platform monitoring for all infrastructure touch points e.g. PRTG, SCOM
  - Infrastructure component catalogues
- You operate effectively in a high-tempo and time critical IT operations and service delivery environment, managing your workload independently and resourcefully to meet deadlines and expectations;
- You work collaboratively with a wide range of IT and Change peers and can clearly communicate solutions to both technical and non-technical team members and stakeholders;

### As Operational Security Services Analyst, we offer you:

- A starting salary of up to £42k pa, negotiable to reflect your technical knowledge and depth of experience.
- Additional employee benefits (incl. employee assistance, life assurance, pension, retail discounts etc.)
- The business as usual flexibility to work from home and visit the office when required
- A supportive, like-minded peer group of senior stakeholders and IT specialists all aiming for the same goal.

### Be part of our IT future

If you would love to join our team as Operational Security Services Analyst, we encourage you to find out more.
